**Subject:** RE: Submission of Rover ADEIS for Co-op Review

Hi Virginia,

It looks like there was an issue with the UPS overnight delivery pickup of the CDs. However, it's been resolved and they should be delivered today. Also, you are still able to immediately view and download the word files from the Onedrive link Kim emailed out Tuesday.

**Subject:** Submission of Rover ADEIS for Co-op Review

Good Morning!

We will be submitting the Administrative Draft EIS for the Rover, Trunkline, and Panhandle Projects today for your review and comment. You will be receiving an email from Kim Sechrist ([kim.sechrist@cardno.com](mailto:kim.sechrist@cardno.com)) that will provide you access to the individual sections on OneDrive. The benefit of editing the files in OneDrive is it allows for multiple people to edit the document simultaneously. Once you receive the link, you will be asked to create a username and a password and a few bits of basic information. Also, while using OneDrive make sure that you use internet explorer ONLY. You may run into some unexpected issues if you use Google Chrome, Firefox or other internet browsers as they don't work well with the service. Once you have access to the files, please make sure to open the files in Word and not Word Online. You can do this by right clicking on the file you would like to open and choosing "Open in Word". This will allow you to have the full functionality of Microsoft Word, including the ability to see all comments and changes as the review progresses.

Once you are finished editing, just hit the save icon at the top of the document (it will look like the typical save icon with the addition of two green arrows) and it will save right back to OneDrive. Hopefully this will reduce the redundancy of edits, and be a more collaborative effort. For those that have requested CDs, those should arrive at your office(s) tomorrow. Remember to use track changes when editing the documents in Word.

Please have all comments/edits completed by **December 7, 2015**. Please keep in mind that this **is not a**

**public document at this point - it is a pre-decisional, agency working document - and therefore, not subject to disclosure.** Please **do not** discuss the contents with those outside of your agency and Rover. Should you get requests to see what you are reviewing - they should be directed to FERC as the lead agency for this EIS. Also, the only people that have access to the files are those that will receive a link, so if there are other staff in your agency that will be reviewing, please send me their email so that they can be granted access. If you have any questions, please feel free to contact me.
